

Hello, Juniper and Elm class

Welcome to Tuesday!

Today you are going to think about volcanoes. I would like you to produce a labelled diagram showing a volcano. You need to decide what sort of volcano you are drawing (shield? composite/cindercone?) Use your research skills to find out what is happening underneath a volcano. Perhaps your volcano is erupting? Think about what type of eruption you would expect from your chosen volcano.

Can you label:

- magma chamber
- caldera (if it has one)
- lava
- vent
- fissure
- crater
- ash cloud
- pyroclastic flow
- the Earth's crust?

Remember, the labels will depend on what sort of volcano you have chosen. See if you can think of something I have missed!

Please bring in your pictures on Wednesday (assuming that school will be open, which I really hope it will).

Have a lovely day and keep safe.

Mrs Trim
